

We would always advise that you visit a jeweller to ascertain your finger size prior to any purchase however should you be unable to do this we have created a size guide below based upon the circumference of your finger.

Finger sizes are very personal and different rings will feel differently on the finger even though they may in fact be the same size. We recommend making an allowance of one full size for wider rings or stacking rings as these will generally sit tighter on the finger.

To ascertain the circumference of your finger we suggest wrapping a piece of string around the finger and marking where the string overlaps itself. Then take the string and measuring the length to mark in. You can then cross reference this against our chart below for your size.
